## 1. Introduction

The document communicates the major new features and changes in this release of the bowbridge Anti-Virus for SAP Solutions. It also documents known problems and workarounds.

## 2. About This Release

Version 3.1.13 Build 866 is a service release to the bowbridge Anti-Virus line of products.

## 3. Supported Operating Systems

This product has been tested on the following platforms or with the following products:

- Linux on x86\_64 (SLES 12 and newer, RHEL 7 and newer)

## 4. Upgrade Procedure

The product installer will detect existing installations if directed to install into the directory of an such an existing installation. It will then offer the option to upgrade the existing installation while preserving all settings and configurations.

Direct upgrade is supported from all 3.x releases. Upgrade at runtime is supported from all releases after v3.1.9

To benefit from service-mode feature introduced in v3.1.13 the installation/upgrade must be run with root privileges, as only root can register and control OS services.

## 5. New Features

The following features have been added to this release:

- Added configuration switches in the Active Content section for added granularity in GIFAR detection to allow exported IOS Live photos:
  - JPG\_ZIP\_IS\_GIFAR
  - PNG\_ZIP\_IS\_GIFAR
  - GIF\_ZIP\_IS\_GIFAR
  - BMP\_ZIP\_IS\_GIFAR

## 6. Bugs and Issues fixed

The following issues have been addressed in this release

- Erroneous detection of all MS Office CDF documents as application/vnd.ms-excel
- Fix in ICAP client – continue receiving on interrupt
- SOPHOS scan engine adapter returning a scan error on encrypted files, instead of “Not Scanned”

## 7. Known Bugs and Limitations

## 8. Version history (previous 3 releases)

### 3.1.13 – 865

#### New Features:

- MIME-type detection for KEYENCE Marking Builder files (.ma2, .mhl)
- New config-file parameter [SCAN] -> MAX\_EXTENSION\_LEN defines maximum length of a filename extension. Extensions exceeding that length are ignored

#### Fixes:

- Occasional failure to deploy SOPHOS Engine/Main Virus Data updates

### 3.1.13 – 863

#### Fixes:

- False positive active content detection PDF files
- Fixed resource leak in libicap if one of two ICAP servers is not available

### 3.1.13 – 862

#### Fixes:

- False positive active content detection in HTML
- Archive scan timeout adjustments for Java archives
- New MIME-type to extension mappings for MHTML
